

PANGAEA DIGITAL LABS

Meet Pawmail

Inbox, *but make it cuddly* — email built for pet owners and the humans who love them.

SAY HELLO

This is **Postie** the pup

Postie fetches every vet reminder, adoption update, and
treat-shop coupon — then trots it straight to your inbox.

WHY PET OWNERS LOVE IT

A warmer inbox

Vet Reminders Auto-sorts shot dates and check-ups into a gentle, on-time nudge.

Treat Deals Bundles every pet-shop coupon into one tidy weekly digest.

Paw Profiles One folder per furry friend, so nothing gets lost in the litter.

HELPFUL TIPS

Get the **most** out of Pawmail

Tag your pets early. Add each companion to a Paw Profile on day one — Postie then routes their mail automatically, no rules to fiddle with.

Pin the vet. Star your clinic's address so appointment confirmations always float to the top of the inbox.

Watch out for look-alikes. Coupon emails from unverified shops land in *Sniff-Test* quarantine — open attachments only after Postie marks the sender safe.

Send mail in **one** call

Drop a treat in your customers' inbox
with the Pawmail Send API — friendly
defaults, a heart-warming payload.

```
curl -X POST https://api.pawmail.app/v1/send \
-H "Authorization: Bearer $PAWMAIL_KEY" \
-H "Content-Type: application/json" \
-d '{
  "to": "human@example.com",
  "from": "postie@pawmail.app",
  "subject": "Bella'\''s vaccine is due 🐾",
  "body": "A gentle nudge from Pawmail!"
}'
```
